Smart Flow Engineering

A Pearlcon Group Company

Achilles BuildingConfidence Gold Accredited | SafeContractor Approved | ISO 9001 Aligned (via Pearlcon)

Automation • Electrical • Drives • Commissioning

Achilles Gold Accredited Engineering Delivery Partner to Tier-1 Contractors & OEMs

Trusted Delivery, Backed by Experience

Operating as part of the Pearlcon Group, we combine SME agility with established engineering governance, ISO 9001 aligned quality systems, and experienced leadership.

Our Core Services

☐ Automation & control systems
☐ Electrical installation & cabling
☐ Drive systems (installation, retrofit, commissioning)
☐ Test & commissioning (FAT/SAT, site integration)

Why Clients Work with Us

☐ Achilles BuildingConfidence Gold accredited
☐ SafeContractor approved (SSIP)
☐ OEM-aligned capability (Sprint Electric, Kosmex)
☐ Rapid mobilisation across the UK
☐ Commissioning-led engineering approach
☐ Flexible, subcontract delivery model

SMART FLOW ENGINEERING

About Us

Smart Flow Engineering Ltd delivers specialist automation, electrical installation and commissioning services across utilities, energy infrastructure, data centres and industrial facilities throughout the UK. We operate as the specialist delivery arm of the established engineering group **Pearlcon**, combining SME agility with the governance, experience and ISO 9001 accredited quality systems of a long-standing engineering organisation.

This structure provides:
Proven Organisational Stability | Established Quality Assurance Processes | Experienced Engineering Leadership | Scalable Delivery Capability | Strong Governance & Compliance Standards

Our Role Within Project Delivery
Smart Flow Engineering supports:
Tier-1 Contractors | OEM Manufacturers | System Integrators | Infrastructure Asset Owners

We are typically engaged during:
- Commissioning and integration phases
- Electrical completion backlogs
- Automation upgrade works
- Drive retrofits and control modernisation
- Shutdowns and planned outages
- Project recovery situations

Our engineers integrate seamlessly into client teams, delivering practical site expertise, structured commissioning support and safe, compliant execution.

PART OF THE

PEARLCON GROUP

Smart Flow Engineering operates within the **Pearlcon Group** structure.
Pearlcon is an established engineering organization with many years
of successful project delivery and ISO 9001 accredited quality management systems.

This relationship enables Smart Flow Engineering to offer:

- Proven organizational stability
- Established quality assurance processes
- Experienced engineering leadership
- Scalable project delivery capability
- Strong governance and compliance standards

Smart Flow Engineering = Specialist Delivery Arm
Pearlcon = Established Engineering Backbone

Vision

To be a trusted engineering delivery partner recognized across the UK infrastructure and industrial sectors for intelligent automation, electrical, and drive solutions- enabling clients to operate safer, smarter, and more sustainably while supporting the transition to digitally connected and energy-efficient assets.

Mission

To deliver safe, reliable, and innovative automation, electrical, and commissioning solutions supporting Tier-1 contractors, OEM partners, and asset owners. Backed by the expertise and quality systems of our parent company **Pearlcon**, we provide flexible engineering support, modernisation solutions, and long-term value across the full project lifecycle.

Core Engineering Services

Smart Flow Engineering delivers specialist automation, electrical and commissioning services that improve reliability, performance and project certainty across infrastructure and industrial environments
We support delivery at installation, integration, commissioning and asset optimization stages.

Automation & Control System

Design integration, upgrade and commissioning of industrial control systems.
PLC & Control System Integration | SCADA Configuration & Support | Automation Upgrades | Legacy System Modernisation | System Fault Finding & Diagnostics | Industrial Network Integration
We support control system replacement, migration and performance optimisation projects with structured testing and safe implementation.

Electrical & MEICA Installation

Industrial electrical installation and infrastructure upgrade support.

Industrial Electrical Installation | Control Panel Installation & Termination | Site Wiring & Containment | MCC & Motor Control Integration | Plant Upgrades & Modifications | Infrastructure Electrical Works Delivered in compliance with project specifications, RAMS and site safety standards.

Drives & Motion Control Specialists

Specialist drive system installation, retrofit and commissioning support.

In partnership with Sprint Electric | AC & DC Drive Installation | Obsolescence Replacement | Drive Retrofits & Upgrades | System Tuning & Optimization | Commissioning & Diagnostics | Emergency Drive Support. Supporting motor control modernization and energy-efficient system upgrades across industrial and infrastructure assets

Testing & Commissioning

Structured commissioning support across complex infrastructure projects.
FAT / SAT Support | Functional Testing | Cause & Effect Verification | Plant Commissioning | Process Start-Up Support | Shutdown & Turnaround Mobilisation | Performance Validation
Our commissioning-led approach reduces risk during critical handover stages.

Technical Support & Maintenance

Responsive engineering support for live operational environments.
Reactive Engineering Support | Breakdown Response | Preventative Maintenance Assistance | Asset Reliability Improvement | Operational Optimisation
We provide experienced engineers capable of rapid mobilisation to support planned and reactive requirements.

Key Sectors We Serve

Manufacturing

- Automation retrofits
- Production line upgrades
- Drive replacements
- Plant modernization
- Industrial troubleshooting

Energy & Power Infrastructure

Supporting contractors delivering projects for organizations such as:

- National Grid
- EDF Energy
- Project types:
- Substations
- Battery energy storage (BESS)
- Renewable energy facilities
- Industrial power systems
- Pumping installations
- Process automation
- Electrical refurbishment projects

Water & Wastewater

- Pumping stations
- Treatment works automation
- Electrical upgrades
- Commissioning & integration support
- Conveyor systems
- Pumping installations
- Process automation
- Electrical refurbishment projects

Data Centers & Mission-Critical Facilities

Supporting delivery teams working within hyperscale and colocation environments

- Electrical & controls commissioning
- Cooling system automation
- Reliability and resilience testing
- Critical infrastructure support

Why
Choose US

At Smart flow engineering, operational excellence is the cornerstone of our success. Our dedication to continuous improvement, safety, and innovation enables us to achieve high levels of productivity while maintaining our commitment to sustainability and community responsibility.

- **Rapid mobilization capability**
- **Automation + Electrical + Commissioning expertise**
- **Backed by established Pearlcon Group**
- **OEM-aligned technical capability**
- **Experienced site engineers**
- **Flexible subcontract delivery model**
- **Reliable project execution**

Engineered Partnership

OEM & Technology Partnerships

Smart Flow Engineering works in collaboration with leading OEMs and technology providers to deliver specialist automation, electrical and drive solutions.

Our partnerships enable direct access to manufacturer support, product expertise, and technical integration capabilities across complex industrial systems.

Key OEM relationships include:

- Sprint Electric -DC drive systems, retrofit and commissioning support
- Kosmex – automation and control system integration support

This OEM-aligned capability allows us to deliver efficient system upgrades, fault resolution, and commissioning with reduced risk and improved performance.

Delivery Model

Smart Flow Engineering operates as a flexible engineering delivery partner, supporting clients across the full project and asset lifecycle.

Who We Support

Tier-1 Contractors | OEM Manufacturers | System Integrators | Infrastructure Asset Owners

---

How We Deliver

Specialist Subcontract Support | Commissioning Teams | Short-Notice Mobilisation | Shutdown & Project Assistance | Technical Problem Solving

---

Our Delivery Approach

- Scalable engineering resource aligned to project demands
- Rapid mobilisation for planned and reactive works
- Integration with client project teams and site operations
- Safe, compliant delivery backed by **SafeContractor** and **Achilles BuildingConfidence** accreditation
- Quality assurance supported by parent company **PearlCon** (ISO 9001 accredited)

Smart Flow Advantage

SME Agility | Group-Level Engineering Assurance | OEM Partnership Support | Practical Site Expertise

Health, Safety & Quality

- **Achilles BuildingConfidence Gold accredited (Achilles ID: 00272549)**
- **SafeContractor approved**
- **ISO 9001 aligned systems (via Pearlcon Group)**
- **Full RAMS and compliant delivery capability**

Smart Flow Engineering Ltd

Flexible Engineering Support When Projects Demand It

Providing commissioning teams, automation expertise, and electrical delivery for contractors, OEMs, and asset owners.
